

VOYAGER POWER CONNECTION FOR MX MODELS

SERVICE NOTICE

POWER INSTALLATION NOTES:

For vehicles that do not have a battery, capacitor, or regulated DC power, an off-vehicle charging solution is required.

Trail Tech's external wall charger (9000-ACA) operates off any standard 110/120V power supply.

- The AC Adapter takes 4-6 to charge Voyager.
- Voyager will operate for 8-10 hours on a single charge.

Note: To use Trail Tech's power adapter with Voyager, update the charge mode in the settings menu:

Set > Power Settings > Charge Mode > "Wall Plug"

Trail Tech Part Number: 9000-ACA
(Only included in AC Voyager Kits for MX motorcycles.)
